

Experience

- Celebal Technologies** | Data Science Intern (Jun 2025 – Aug 2025)
- Streamlined ML workflows with automated feature engineering, hyperparameter tuning, and advanced evaluation metrics, boosting predictive performance; built and deployed a RAG-based GenAI chatbot using LangChain with fine-tuned LLMs and context-aware quality evaluation.
 - Built a production-grade Network Anomaly Detection System with FastAPI and React, leveraging advanced ML models, Docker/Kubernetes deployment, and Prometheus/Grafana monitoring for real-time reliability.
- India Meteorological Department, New Delhi** | AI/ML Intern (July 2024 - Aug 2024)
- Analyzed meteorological data and forecasting patterns to study heat terminal stress on wheat crops, improving prediction accuracy by 15%, and developed *Mausam Fasal Sathi*—a real-time, multilingual AI chatbot delivering district-based forecasts, rainfall summaries, and crop advisories to 5+ lakh farmers.
 - Enhanced the chatbot's NLP pipeline by integrating Hugging Face Transformers and LLAMA 2, achieving a 25% increase in user engagement.
- Igrow Solutions** | Freelance (Jan 2023 - May 2023, Nov 2024 - Dec 2024)
- Produced explainer content for an in-house program and led outreach to 100+ YouTube creators, boosting impressions and engagement by 40% and increasing subscribers by 30%.
 - Recognized with a ₹10,000 monthly stipend for impactful, data-driven initiatives that strengthened brand influence.

Key Projects

- AlzCare—A Smart Assistance System for Daily Activities in Alzheimer's Patients**  (April 2025 - May 2025)
- Implemented a real-time human activity detection mobile application using MediaPipe Pose + CNN-LSTM, achieving 92%+ recognition accuracy and triggering instant SMS/email alerts for falls or anomalies via workflow automation, reducing emergency response time by 60%.
 - Built an interactive UI with live activity tracking, journaling, cognitive mind games, and caregiver notifications, lowering supervision burden and enabling non-intrusive, cost-effective in-home Alzheimer's care.
- Real-Time Object Detection using YOLO Variants with Nature-Inspired Algorithm**  (Feb 2025 - Apr 2025)
- Engineered an AI-based object detection compiler integrating YOLOv8, YOLOv11, and YOLO-World with hybrid PSO-GWO optimization, achieving 93.2% mAP@0.5 and 185+ FPS real-time performance on Pascal VOC.
 - Enhanced localization accuracy using dual-stage refinement (Canny edge detection + SIFT keypoints), reducing bounding box localization error to 3.10 px and achieving 98.44% computational complexity reduction.
- Misinformation Mitigation in Social Networks via Graph-Theoretic Interventions**  (Jan 2025 - Apr 2025)
- Pioneered a scalable misinformation mitigation framework using ICM on the OGBN-Arxiv dataset (169K+ nodes, 1.1M+ edges), simulating misinformation diffusion and evaluating ten strategic edge/node blocking interventions.
 - Proposed a hybrid IEED + community detection approach and soft blocking method, achieving a 95%+ reduction in misinformation spread, lowering the average infection rate from 29.9% to 1.38%, with structural integrity preserved for real-time social networks.

Skills

Languages: Python, C/C++, JavaScript, HTML/CSS, SQL, Dart

Machine Learning & Data Science: Scikit-Learn, Pandas, NumPy, OpenCV, TensorFlow, PyTorch, Keras, Altair AI Studio, NLP, Transformers, LLMs, Langchain

Frameworks & Development: Flask, Django, REST APIs, WebSockets, MediaPipe, Bootstrap, Tailwind CSS, Kivy

Cloud Platforms & Systems: AWS (EC2, DynamoDB), Linux, Version Control (Git/GitHub)

Soft Skills: Problem Solving, Team Collaboration, Multitasking, Organizational Skills, Adaptability

Educational Credentials

Amity University Punjab, Mohali 2022 - Present

- B.Tech Computer Science and Engineering | CGPA: **8.42**, SGPA: **9.09** (6th Sem)

Relevant Coursework: Machine Learning, Deep Learning, Computer Vision, Data Mining, DSA, OS, Discrete Mathematics, Statistical Methods, OOP, Theory of Computation, Computer Networks, DBMS, COA, Matlab

Pratap Public School, India

- Class XII - 89% (2021 - 2022) Class X - 93.33% (2019 - 2020)

Scholastic Achievements

- Built Leadlinker – an AI-powered LinkedIn Sales Automation tool at The AI Hiring Show by Rabbitt Learning (2025).
- Semi-Finalist – Flipkart GRID 7.0, Early Careers Program 2025
- Finalist, HackOrbit 2025 at MITS Gwalior — recognized for innovation in a 36-hour national hackathon.
- Earned LeetCode 50 Days Badge and 100 Days Badge for consistent problem-solving.
- Kaggle Community Competitor badge for a data science competition in April 2025.
- Completed LeetCode's Pandas track — earned the "Introduction to Pandas" badge (Jan 2025).
- Ranked 14,087 (97.25 percentile) in Round 1 & 5,106 in Round 2 (Data & AI) of Naukri Campus Young Turks 2024.
- Special Mention in Altair® Data Science Contest for predictive modeling using RapidMiner (Sep 2024).
- Mind Maze Escapade at Cognizance, IIT Roorkee—Secured 3rd place and won a ₹5000 cash prize (Mar 2024).
- 3rd Position, Ideathon: Resolve to Solve by AUP, Mohali (June 2023).
- 3rd Position – Code S.O.S Coding Competition at AUP Mohali, June 2023
- Recognized as Budding Innovators in the Venture Vault event by AUP, Mohali (May 2023).
- 2nd Prize – CyberGlyphics 2023, AUP Mohali, for designing a cybersecurity-themed comic using Adobe Photoshop.
- 2nd Prize, Technovation by AUP, Mohali (Nov 2022).

Value-Added Courses

- Data Analytics Job Simulation** | Deloitte Australia (Forage)
- Data Science & Analytics—HP LIFE Online Course** | HP Foundation
- Generative AI Explained** | NVIDIA
- Augment Your LLM Using Retrieval Augmented Generation** | NVIDIA
- Machine Learning and AI with Python** (HarvardX • CS109xa) | edX
- Foundations of Project Management**, Google | Coursera
- Project Initiation: Starting a Successful Project**, Google | Coursera
